Web Developer

Full-Stack Developer | CAPM® | Web Apps & Business Systems

Career Summary

Full-stack web developer with 3+ years of hands-on experience delivering production websites, web apps, and business systems using WordPress, HTML/CSS/JS, React, and Node.js/Express. Skilled in building client/admin dashboards, implementing database-driven features, and shipping reliable solutions with authentication, analytics integrations, and technical SEO foundations. CAPM-certified with strong project coordination skills, leading client consultations, translating requirements into scopes/backlogs, and delivering in clear milestones.

Personal Project

Membership Management System

JAN 2026 - Current

Full-Stack Web App (Node.js, Express, PostgreSQL, EJS, Bootstrap 5)

- Building a gym/health & wellness Membership Management System with separate Admin Dashboard and Member Portal experiences.
- Implemented MVC-style backend structure (controllers/routes/middleware), improving maintainability and feature scaling.
- Designed and developed a responsive client-facing dashboard UI using Bootstrap 5, with modular page structure and reusable UI components.
- Integrated PostgreSQL as the system's single source of truth, wiring the database to both admin and member-facing flows.
- Delivered full CRUD functionality for members (Create/Read/Update/Delete) directly from the Admin Dashboard.
- Built and connected REST-like endpoints to power admin operations and UI rendering.
- Implemented JWT-based authentication (login/logout) with secure session handling patterns.
- Developed protected routing for member pages, ensuring access is gated by authenticated user context.
- Began dynamic member portal rendering by hydrating views with user data fetched from the database (server-side rendering via EJS).

- Standardized reusable database fetch logic for authenticated users (reducing repeated queries across controllers).
- Implemented form handling and validation patterns for member onboarding and updates, returning meaningful HTTP status responses.
- Created database-backed “join date / membership fields” handling and ensured data persists correctly across the signup/admin flows.
- Resolved real-world integration issues including nested routing bugs, view path resolution, and ESM import path issues.
- Improved overall reliability through debugging common Node/Express issues (404 routes, env secrets, file path case-sensitivity, template includes).
- Designed initial database schema expansions for future modules (e.g., plans, memberships, class types, class sessions) to support billing and scheduling phases.

Work Experience

Smile Property (Pty) Ltd

2025 MAR – 2025 NOV

Web & Web App Developer

- Reduced office admin workload by 33% by digitizing tenant workflows and implementing automated request/intake forms.
- Developed and enhanced client-facing and admin UI for the real estate platform (landlord, tenant, and admin dashboards).
- Implemented features from requirements including property listings, lead capture forms, admin tools, and tenant support workflows.
- Integrated frontend components with backend services by **wiring UI to API/backend functionality** and handling validation plus error states.
- Assisted with database-driven features, including mapping data from the database to views, working with the schema, and supporting CRUD flows.
- Performed code maintenance and refactoring to improve readability, performance, and long-term maintainability.
- Improved site performance, usability, and security through best-practice recommendations and implementation (responsive design, faster load times).
- Set up and monitored traffic/usage analytics to understand user behaviour and guide iterative improvements.

Prestigious Solutions (Pty) Ltd

2024 AUG – 2024 DEC

Full-Stack Web Developer & Project Coordination

- Led discovery and delivery: ran stakeholder consultations, translated needs into scope, backlog, priorities, and release milestones.
- Architected and shipped a mobile-first web platform using **Node.js/Express** deployed on **Heroku**, with **Afrihost DNS** (apex to www redirect) and automated SSL for stable production hosting.
- Implemented security hardening with **Helmet + Content Security Policy**, configuring allowlists for **cdnjs**, **Zoho Forms**, and **Google Tag Manager**.
- Built conversion-ready UX: embedded **Zoho Forms** as a full-screen lazy-loaded modal, improved accessibility, enabled file uploads, and routed submissions into CRM/email workflows.
- Delivered analytics & technical SEO: Search Console verification, **GTM/GA**, XML sitemap, robots.txt, and **page-level JSON-LD** to improve indexing and visibility.
- Diagnosed and resolved production issues (503 errors, CSP blocks, redirect loops), implementing clean redirect logic to stabilize user flows and search indexing.
- Shipped content & UX for core services, aligning website copy with brand voice and structured data for better clarity and conversion.
- Managed ongoing operations: maintenance, uptime checks, dependency updates, and iterative enhancements post-launch.
- Produced supporting marketing collateral (website copy and service one-pagers) to support outreach and client acquisition.

SMConnect

2021 JUL – 2024 AUG

Full-Stack Web Developer + Project Coordination

- Led client discovery and consultations to translate business needs into clear requirements, scope, and delivery plans.
- Built and launched websites and web apps using **WordPress** and **custom HTML/CSS/JavaScript**, aligned to brand and conversion goals.
- Developed bootsratp frontends for interactive pages and dashboards, focusing on reusable components and responsive UI.
- Implemented backend features with **Node.js/Express**, including routing, validation, and CRUD endpoints for client workflows.
- Coordinated delivery using lightweight PM practices: timelines, task breakdowns, feedback cycles, and stakeholder updates.
- Integrated lead-capture forms and business tools (email workflows, analytics, SEO essentials) to support customer acquisition.
- Managed deployments end-to-end: hosting setup, **domains/DNS**, **SSL**, releases, and post-launch monitoring.
- Delivered ongoing maintenance and improvements: bug fixes, feature updates, content changes, and security/backup checks.

Tech Stack

HTML/CSS, JavaScript, Node.JS, Express.JS, RESTful API , Auth API, integrations, CI/CD, JQuery, bootstrap, WordPress, Elementor, WooCommerce, SEO, GEO, site verification, site analytics, Semrush, zoho, Hosting management, AI websites, Lovable, Horizon, ChatGPT, Generative AI, Prompt Engineering, plugin development, Git, version control and repository management, Integration of payment gateways, AWS(beginner), Databases, SQL, PostgreSQL, MongoDB

Project Management Skills

Project management, planning, scheduling, client consultation, stakeholder communication, software development and testing, procurement and resource management, quality assurance, agile methodology, Jira, Trello, Microsoft project, Microsoft suite, asana, CRM, stakeholder communication, budgeting, change management, project lifecycle, risk management

Soft Skills

Problem-solving, critical thinking, Adaptability, quick learning, Attention to detail, results driven, Time management, team collaboration and approachable.

Certifications

- Full-Stack Web Development Bootcamp (Sep 2025)
- Project Management Professional (PMP) TRAINING - TIA Education (Nov 2024)
- Certified Associate in Project Management (CAPM)® - Project Management Institute (Dec 2024)

Education

- University of Cape Town (Completed 3 years, not graduated)
  BSc Mechanical Engineering, MAR 2017 - DEC 2019

- Eqinisweni Secondary School
  MATRIC/ HIGH SCHOOL DIPLOMA, Dec 2016
  Aggregate: 82%
