Full Stack Developer

Full-Stack Developer | Business Systems & Scalable Web Applications | CAPM® Certified

Career Summary

Full-stack web developer with 3+ years of experience designing and delivering scalable web applications, business systems, and production websites using React, Node.js/Express, PostgreSQL, and WordPress. Experienced in architecting admin/client dashboards, implementing secure authentication flows, and building database-driven systems that replace manual processes and improve operational visibility.

Strong understanding of RESTful APIs, MVC architecture, and relational data modeling, with a focus on maintainable, extensible codebases. CAPM-certified, combining technical execution with structured project coordination - leading client consultations, translating requirements into actionable backlogs, and delivering solutions in defined milestones.

Work Experience

Fitnexus

April 2026 - Current

Full-Stack Developer (Founder-led Product Development)

- Architecting and developing a multi-tenant SaaS platform for gyms to manage memberships, attendance tracking, and operational workflows.
- Building full-stack features using **Node.js**, **Express.js**, **PostgreSQL**, **JavaScript**, **HTML/CSS**, and modern frontend frameworks.
- Implemented gym onboarding workflows including registration systems, subdomain/domain mapping, and admin account provisioning.
- Managed cloud deployment infrastructure including database hosting, environment configurations, and platform scalability planning.
- Integrated REST APIs (soon and payment workflow logic soon) to support subscription-based business models.
- Designed system workflows to replace manual operational processes for fitness businesses.
- Collaborated with design and business stakeholders to align product development with customer acquisition goals.

Management System Developer & Product Owner

- Led the end-to-end design and development of a custom Membership Management System (MMS), transitioning the club from fully manual record-keeping to a centralized digital platform.
- Replaced fragmented manual tracking processes with a centralized system, improving data accuracy and operational visibility across the organization.
- Architected a scalable MVC-based backend (Node.js/Express) and relational PostgreSQL database to serve as the single source of truth for member data, onboarding, and progress tracking.
- Digitized member lifecycle management, enabling structured tracking of join dates, membership tiers, health records, and engagement history.
- Developed secure RESTful APIs powering both Admin Dashboard and Member Portal workflows.
- Implemented JWT-based authentication with protected routing and role-based access control for admin and member contexts.
- Built a responsive, component-driven dashboard UI using Bootstrap 5 with dynamic server-side rendering (EJS).
- Delivered full CRUD functionality for member management, significantly reducing administrative overhead and eliminating spreadsheet-based processes.
- Standardized reusable backend query patterns and service-layer logic to improve maintainability and future feature expansion.
- Designed forward-compatible schema modules (plans, class sessions, memberships) to support upcoming billing and scheduling functionality.
- Enabled data-informed sales opportunities by structuring member health and engagement data, allowing the club to better position health products and gym services based on tracked member profiles.

Smile Property (Pty) Ltd

2025 MAR – 2025 NOV

Web & Web App Developer

- Reduced office admin workload by 33% by digitizing tenant workflows and implementing automated request/intake forms.
- Developed and enhanced client-facing and admin UI for the real estate platform (landlord, tenant, and admin dashboards).
- Implemented features from requirements including property listings, lead capture forms, admin tools, and tenant support workflows.
- Integrated frontend components with backend services by **wiring UI to API/backend functionality** and handling validation plus error states.
- Assisted with database-driven features, including mapping data from the database to views, working with the schema, and supporting CRUD flows.
- Performed code maintenance and refactoring to improve readability, performance, and long-term maintainability.
- Improved site performance, usability, and security through best-practice recommendations and implementation (responsive design, faster load times).
- Set up and monitored traffic/usage analytics to understand user behaviour and guide iterative improvements.

Full-Stack Web Developer & Project Coordination

- Led discovery and delivery: ran stakeholder consultations, translated needs into scope, backlog, priorities, and release milestones.
- Architected and shipped a mobile-first web platform using **Node.js/Express** deployed on **Heroku**, with **Afrihost DNS** (apex to www redirect) and automated SSL for stable production hosting.
- Implemented security hardening with **Helmet + Content Security Policy**, configuring allowlists for **cdnjs**, **Zoho Forms**, and **Google Tag Manager**.
- Built conversion-ready UX: embedded **Zoho Forms** as a full-screen lazy-loaded modal, improved accessibility, enabled file uploads, and routed submissions into CRM/email workflows.
- Delivered analytics & technical SEO: Search Console verification, **GTM/GA**, XML sitemap, robots.txt, and **page-level JSON-LD** to improve indexing and visibility.
- Diagnosed and resolved production issues (503 errors, CSP blocks, redirect loops), implementing clean redirect logic to stabilize user flows and search indexing.
- Shipped content & UX for core services, aligning website copy with brand voice and structured data for better clarity and conversion.
- Managed ongoing operations: maintenance, uptime checks, dependency updates, and iterative enhancements post-launch.
- Produced supporting marketing collateral (website copy and service one-pagers) to support outreach and client acquisition.

Full-Stack Web Developer & Project Coordination

- Led client discovery and consultations to translate business needs into clear requirements, scope, and delivery plans.
- Built and launched websites and web apps using **WordPress** and **custom HTML/CSS/JavaScript**, aligned to brand and conversion goals.
- Developed bootstrap frontends for interactive pages and dashboards, focusing on reusable components and responsive UI.
- Implemented backend features with **Node.js/Express**, including routing, validation, and CRUD endpoints for client workflows.
- Coordinated delivery using lightweight PM practices: timelines, task breakdowns, feedback cycles, and stakeholder updates.
- Integrated lead-capture forms and business tools (email workflows, analytics, SEO essentials) to support customer acquisition.
- Managed deployments end-to-end: hosting setup, **domains/DNS**, **SSL**, releases, and post-launch monitoring.
- Delivered ongoing maintenance and improvements: bug fixes, feature updates, content changes, and security/backup checks.

Tech Stack

HTML/CSS, JavaScript, Node.JS, [Express.JS](#), RESTful API , Auth API, integrations, CI/CD, JQuery, bootstrap, WordPress, Elementor, WooCommerce, SEO, GEO, site verification, site analytics, Semrush, zoho, Hosting management, AI websites, Lovable, Horizon, ChatGPT, Generative AI, Prompt Engineering, plugin development, Git, version control and repository management, Integration of payment gateways, AWS(beginner), Databases, SQL, PostgreSQL, MongoDB

Project Management Skills

Project management, planning, scheduling, client consultation, stakeholder communication, software development and testing, procurement and resource management, quality assurance, agile methodology, Jira, Trello, Microsoft project, Microsoft suite, asana, CRM, stakeholder communication, budgeting, change management, project lifecycle, risk management

Soft Skills

Problem-solving, critical thinking, Adaptability, quick learning, Attention to detail, results driven, Time management, team collaboration and approachable.

Certifications

- Full-Stack Web Development Bootcamp (Sep 2025)
- Certified Associate in Project Management (CAPM)® - Project Management Institute (Dec 2024)
- Project Management Professional (PMP) TRAINING - TIA Education (Nov 2024)

Education

- University of Cape Town (Completed 3 years, not graduated)
BSc Mechanical Engineering, MAR 2017 - DEC 2019
- Eqiniswa Secondary School
MATRIC/ HIGH SCHOOL DIPLOMA, Dec 2016
Aggregate: 82%
